SUMMARY

Full Stack Developer and Computer Science undergraduate at Prathyusha Engineering College with strong problem-solving skills and hands-on experience in building scalable web applications. Proficient in frontend technologies like React.js and experienced in developing UI-driven projects and functional web solutions. Actively practices Data Structures and Algorithms to write efficient, optimised code. Experienced in conducting technical workshops, demonstrating strong communication and technical expertise. Continuously upskilling in AI, Machine Learning, and modern development tools to build intelligent, user-centric applications.

EDUCATION

Bachelor Of Engineering - Computer Science and Engineering, 09/2023 – 05/2027 | Tiruvallur, Tamilnadu
Prathyusha Engineering College | CGPA : 8.22(6th Sem)

Higher Secondary, Bharathi Dasan Matric.Hr.Sec School | Percentage : 75.5% 06/2021 – 05/2023 | Tiruvallur, Tamilnadu

SKILLS

- | | | | |
|---|--|---|--------------------------------------|
| • Front-end : HTML, CSS, JavaScript, React.js | • Back-end : Node.js, Express.js, Python | • Database : MongoDB, Supabase, Firebase, MySQL | • Google Platform (Cloud, Analytics) |
| • Python | • C | • Java | • Command Line |
| • UI/UX Design (Figma) | • 3D Model (Blender) | • Unity | • Git & GitHub |

PROJECTS

- Intellexa AI** [🔗](#), *An Intelligent AI Assistant for Smart, Context-Aware Solutions*
Intellexa-AI is an AI-driven application focused on building intelligent, interactive solutions using modern machine learning and web technologies. The project likely integrates user input processing with AI models to generate meaningful insights or automated responses, demonstrating the practical implementation of AI concepts. It reflects hands-on experience in combining frontend interfaces with backend logic and AI workflows, showcasing skills in full-stack development and AI integration. The project emphasizes real-world usability, modular design, and scalable architecture, aligning with modern trends in intelligent application development.
- Mathsol** [🔗](#), *The mathematical formula calculator*
Developed **Mathsol Website**, a web-based mathematical formula calculator that provides step-by-step solutions for user inputs. The application is designed with an intuitive UI to simplify complex calculations and enhance user understanding of problem-solving processes.
- Chess** [🔗](#), *The Chess Game*
Developed an interactive **Chess Game Application** that enables users to play chess with real-time move validation and game logic implementation. The project incorporates core chess rules such as piece movement, check/checkmate detection, and turn-based gameplay. Designed with a user-friendly interface, the application demonstrates a strong understanding of frontend development, as well as backend/ game logic integration. It highlights problem-solving skills through the implementation of algorithms for move validation and game state management, similar to modern web-based chess platforms
- Study Hub** [🔗](#), *AI-Powered Collaborative Learning Platform*
Developed **Study Hub**, an AI-powered educational platform designed to enhance collaborative learning through integrated discussion, resource sharing, and intelligent assistance. The platform combines social interaction features with AI capabilities, including personalized learning support, automated explanations, and academic assistance. Built using a full-stack architecture (Python/Flask, APIs, and cloud integrations), the system enables students to connect, share knowledge, and access learning resources in a centralized environment. It demonstrates strong skills in AI integration, backend development, and scalable system design
- Resume Builder** [🔗](#), *GitHub-Based Dynamic Resume and Portfolio System*
Developed a personal **Resume Repository** to showcase professional profile, technical skills, projects, and achievements in a structured and accessible format. The project highlights proficiency in organising developer portfolios using GitHub, enabling easy sharing and version control of resume content. It reflects strong attention to detail, clean presentation, and effective use of GitHub as a professional branding tool, demonstrating readiness for industry opportunities and collaboration.

CERTIFICATES

- | | | | |
|--|--|--|--|
| • Oracle Cloud Infrastructure 2025 Certified Foundations Associate 🔗 | • Google Analytics Certification 🔗 | • Introducing SAP Business Data Cloud 🔗 | • Introduction to Generative AI: Art of the Possible 🔗 |
| • AWS Cloud Practitioner Essentials 🔗 | • Mobile Virtual Reality and Artificial Intelligence 🔗 | • Database Management System 🔗 | • Industry-Supported Course on Generative AI 🔗 |
| • UI / UX for Beginners 🔗 | • GenAI Study Jam (Google Cloud) 🔗 | • Intro to Graphic Design with Photoshop 🔗 | |

INTERNSHIP

- Full Stack Development** [🔗](#), *From CodeAlpha* 01/2026 – 01/2026
Completed a 1-month Full Stack Development Internship at CodeAlpha, where I gained hands-on experience by building real-world web applications. During the internship, I developed a Real-Time Communication App that enables live user interaction with responsive UI and real-time data flow, and a Simple E-Commerce Website featuring product listing and an intuitive shopping interface. These projects strengthened my skills in frontend development, real-time application handling, and core web application design while improving my understanding of building user-centric and scalable solutions.
